

PRAJJWAL SILWAL

Automation Engineer & Data Analyst

silwalprajjwal@gmail.com · +1 (318) 557-8090 · linkedin.com/in/prajjwal-silwal · prajjwalsilwal.github.io · Monroe, LA

PROFESSIONAL SUMMARY

Automation Engineer and Data Analyst with 4+ years building Python pipelines, PostgreSQL backends, and BI dashboards across property management, IT operations, and market intelligence environments. Delivered production systems spanning end-to-end data automation, full-stack web development (Next.js, Sanity CMS), and AI agent deployment — consistently eliminating manual overhead and driving measurable business outcomes.

TECHNICAL SKILLS

Languages & Databases: Python, SQL, PostgreSQL, JavaScript, DAX, R

Automation & Pipelines: Playwright, Prefect, ETL, Web Scraping, API Integration, Workflow Automation

Data & Analytics: Power BI, Pandas, NumPy, Tableau, Power Query, Jupyter, Data Modeling, scikit-learn

Web & AI Tools: Next.js, React, Sanity CMS, Tailwind CSS, Open WebUI, VAPI, Retell AI, LLM Deployment

IT Systems: OS Deployment (Windows/Linux), Virtualization (UTM, Parallels), Hardware Lifecycle, Network Security

PROFESSIONAL EXPERIENCE

Automation & Data Engineer · Braud Property Management · Jan 2026 – Present

- Architected the Braud Pipeline; Playwright + Prefect system automating 17–19 nightly Buildium report extractions into PostgreSQL, eliminating all manual data entry across managed properties
- Built braudproperties.com, production Next.js + Sanity CMS rental platform surfacing live listings across 200+ units and 10 properties, with Buildium integration for online tenant applications
- Deployed analytics dashboard delivering daily occupancy, delinquency, and maintenance KPIs to ownership, converting raw pipeline data into executive-ready decisions
- Configured local AI agents (Open WebUI, VAPI, Retell AI) to automate property management communication workflows and reduce manual tenant interaction overhead

Technical Analyst & Support Lead · Independent Contractor · Jan 2022 – Dec 2025

- Built Python + SQL diagnostic dashboards monitoring metrics across 30+ client endpoints; cut average troubleshooting time by 20% through real-time visibility and automated alerting
- Automated Python web scraping pipelines extracting and structuring data on 500+ local businesses from public directories, producing analysis-ready market intelligence datasets
- Managed IT support and hardware lifecycle for 20+ clients; maintained 95% first-time fix rate and reduced average system downtime by 15% through proactive maintenance programs

EDUCATION

University of Louisiana at Monroe · Monroe, LA · Jan 2019 – May 2023

100+ Credit Hours toward B.S. in Mathematics and Computer Science

Coursework: Statistics, Calculus, Linear Algebra, Data Modeling, Probability · Math Tutor to 100+ students

CERTIFICATIONS

Google Data Analytics Professional Certificate · Google IT Support Professional Certificate
