

PRAJJWAL SILWAL

WEB DESIGNER & TECHNICAL SPECIALIST

silwalprajjwal@gmail.com | +1 (318) 557-8090 | linkedin.com/in/prajjwal-silwal/ | prajjwalsilwal.github.io

PROFESSIONAL SUMMARY

Technical professional with a strong foundation in web automation, dashboard UI design, and systems architecture. Specializes in building reliable backend pipelines, troubleshooting web environments, and developing custom web interactions using Python and Playwright. Eager to apply deep technical problem-solving skills, system administration experience, and an eye for data-driven design to restore, optimize, and manage high-quality websites and digital storefronts.

TECHNICAL SKILLS

Web & Development: Python (Playwright, Web Scraping/Automation), Dashboard UI/UX Design, Local LLM Deployment (Open WebUI), API Integration & Workarounds.

Data Analysis & Visualization: SQL (CTEs, Window Functions, ETL), PostgreSQL, Power BI (DAX, Star/Snowflake Modeling), Python (pandas, NumPy).

IT Systems & Administration: Hardware Lifecycle Management, Virtualization (UTM, Parallels), OS Deployment (Windows/Linux), Network Security & Troubleshooting.

Soft Skills: Critical Thinking, Problem Solving, Adaptability, Time Management, Independent Project Management, Attention to Detail, Curiosity.

PROFESSIONAL EXPERIENCE

AUTOMATION & DATA ENGINEER | BRAUD PROPERTY MANAGEMENT

JAN 2026 – Present

- Architected and developed the "Braud pipeline," a robust automated web and data pipeline utilizing Playwright and Prefect to seamlessly extract and process 17–19 routine reports.
- Engineered backend integration with PostgreSQL, ensuring secure data flow and stable architecture for property management reporting.
- Navigated complex platform constraints (Buildium Growth plan lacking native API access) by designing custom web automation scripts to ensure uninterrupted business logic.
- Deployed and configured local AI agents and web interfaces (Open WebUI, VAPI, Retell AI) to modernize property management workflows.

TECHNICAL ANALYST AND SUPPORT LEAD | CONTRACT

JAN 2022 – DEC 2025

- Managed end-to-end IT support and hardware lifecycles for 20+ remote and local clients, deploying operating systems and cross-platform virtual environments (UTM, Parallels) to reduce system downtime by an average of 15%.
- Automated Python web scraping scripts to extract, clean, and compile local business data from web directories, processing 500+ records to support client outreach and market analysis.
- Developed custom diagnostic workflows using Python and SQL to track performance metrics across 30+ endpoints, visualizing the data in tailored UI dashboards to cut troubleshooting time by 20%.
- Executed hardware repairs, component upgrades, and thermal optimizations for high-performance workstations, maintaining a 95% first-time fix rate and extending average device lifespans by 1–2 years.

CERTIFICATES

Google Data Analytics Certificate

Google IT Support Certificate

EDUCATION

UNIVERSITY OF LOUISIANA AT MONROE | Monroe, LA

JAN 2019 – MAY 2023

Completed 100+ Credit Hours toward B.S. in Mathematics and Computer Science

Relevant Coursework: Statistics, Calculus, Linear Algebra, Data Modeling, Probability
